1. The construction of a new Elbe River dam at Horni Grunt is planned [1]; the dam is to supply the waterhead for a new electric plant. Locks will be provided for ships to pass through the dam, since the water level will be raised by 15 meters at the dam and by 10 meters at Decin.

2. In connection with the dam at Horni Grunt, a new loading quay is under construction on the right bank of the river, at Loubi, below Decin. The quay is 12 meters high and about 2,000 meters long. It will be equipped with modern cranes. Warehouses will be erected all along the length of the quay. Two building located at its northern end were ready at the time of observation.

Comment: [redacted] it was reported that the dam at Horni Grunt was to be started in spring 1953. 25X1
